

# Managing the effects of Lymphoedema using VeraPanthen lotion

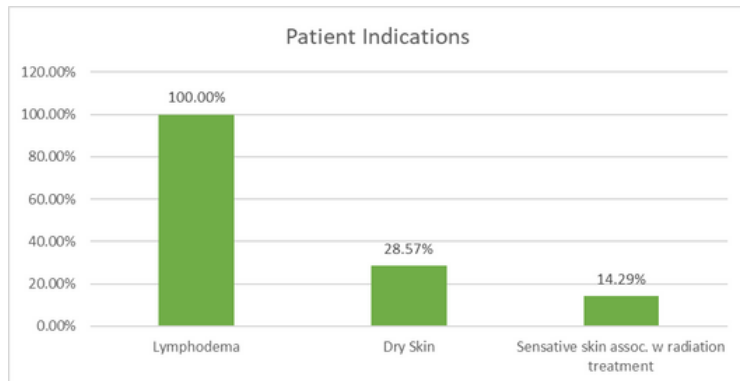

A customer feedback survey taken from patients suffering from Lymphoedema.  
Interim results taken 01/07/2023 - 25/09/2023

## Introduction

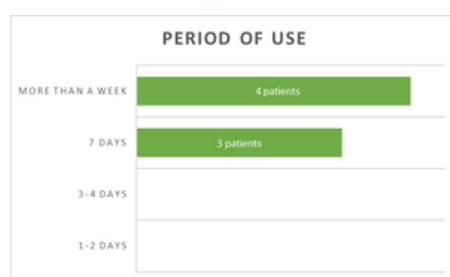

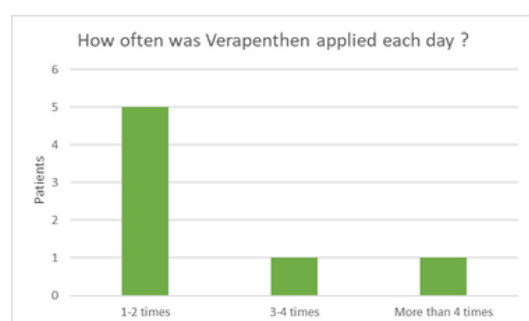

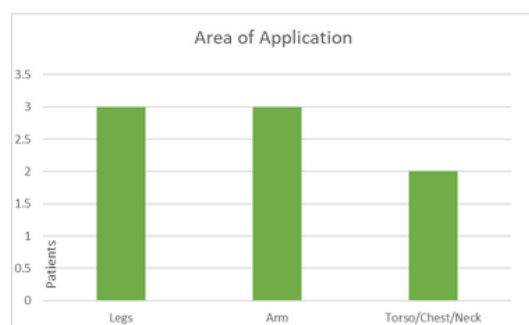

Lymphoedema can cause the skin to feel dry, itchy and heavy which can be very uncomfortable. The purpose of this survey is to measure the efficacy of VeraPanthen to soothe uncomfortable skin and improve patient comfort.

## Patient Profile

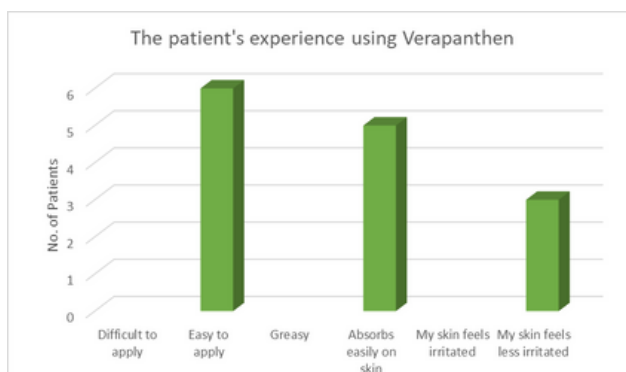

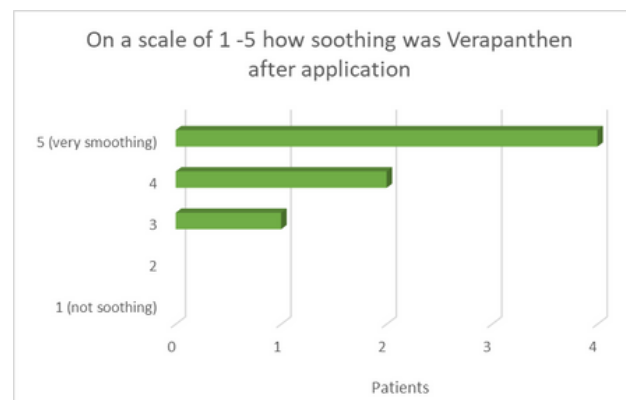

Number of participants	7
Average age	59 years

## Application

## Results

WOULD YOU RECOMMEND VERAPANTHEN TO A FRIEND? 7/7 SAID YES

## Patient comments

"Great product."

"Very soothing applied chilled from the fridge"

"Really liked the product"

"Lovely gentle smell, not overpowering"

"Excellent product"

## Conclusion

All participants found VeraPanthen to be soothing when applied to skin affected by Lymphoedema. Patients suffering from additional conditions such as dry skin or sensitivity due to radiation treatment gave a higher rating for soothing and comfort. None of the participants had any negative reaction to the lotion. 100% of participants would recommend VeraPanthen to a friend.
