

## Carbon Reduction Plan

### Our Goal

Reduce New Vision Healthcare’s carbon emissions across all operations and services to achieve **Net Zero by 2040**, with major reductions by 2030.

This Carbon Reduction Plan outlines how we’ll cut emissions, improve efficiency, and create a more sustainable healthcare system—without compromising customers care.

### Our Carbon Reduction Targets

Category	Target	Timeline
Overall Emissions	50% reduction (from 2023 baseline)	By 2030
Renewable Energy	50% of electricity from renewables	By 2030
Fleet Emissions	Fully electric vehicle fleet	By 2035
Waste to Landfill	Zero waste to landfill	By 2035
Net Zero	Net Zero across operations	By 2040

### Action Plan by Focus Area

#### 1. Energy Efficiency & Clean Energy

- **Audit** energy use to identify and address inefficiencies.
- **Upgrade** lighting to LED and install smart sensors to reduce unnecessary usage.
- **Purchase 50% renewable electricity** by 2030.
- **Explore on-site renewable generation**, such as solar panels at major facility.

#### 2. Sustainable Transportation

- **Replace fleet vehicles** with electric or hybrid models.
- **Install EV charging stations** at key location for fleet and staff use.
- Promote **low-carbon commuting**, offering incentives for cycling, and carpooling.

- Expand **telesales and online services** to reduce customers travel emissions.

### **3. Waste Reduction & Sustainable Procurement**

- Partner with **suppliers** who prioritize sustainable packaging and lower-carbon products.
- Implement **waste segregation systems** to increase recycling and composting.
- **Phase out landfill waste** by 2035 through recycling, reusing, and energy recovery.

### **4. Low-Carbon Clinical Practices**

- Introduce **reusable medical products** where safe and feasible.
- Develop **sustainable procurement policies**, requiring suppliers to disclose and reduce their emissions.

### **5. Water Conservation**

- Monitor water usage to identify and fix leaks promptly.

### **6. Climate-Resilient Facilities**

- Include **green spaces** where possible to improve air quality and community health.

### **Measuring Progress**

We will:

- Track and report emissions data **annually**.
- Adjust strategies regularly based on results and innovations in sustainable healthcare.

### **Governance**

- Appoint a **Sustainability Supervisor** to oversee the Carbon Reduction Plan.
- Provide **quarterly updates** to the Executive Board and publish **annual sustainability reports**.

### **Engaging Staff and Customers**

- Train staff on **carbon-conscious practices**.
- Encourage customers involvement in sustainability initiatives (e.g., choosing telesales or online sales, recycling programs).

### **Our Commitment**

This Carbon Reduction Plan is a key part of New Vision Healthcare's mission to deliver healthcare that protects both people and the planet. By cutting emissions and adopting sustainable practices, we are future-proofing healthcare delivery for the generations to come.
